ROBERT KAMAL

Junior DevOps Engineer

01206339677 • robertkamal00@gmail.com • linkedin.com/in/robertkamaladly • github.com/Robert2000361 • Cairo, Egypt

Professional Objective

Junior DevOps Engineer with strong foundations in Linux administration, networking (CCNA), and cloud fundamentals. Hands-on experience with Git workflows, Bash automation, Docker containerization, and CI/CD concepts through structured DevOps training.
Seeking a Junior DevOps Engineer role where I can contribute to automation, infrastructure reliability, and efficient deployment workflows.

Experience

Digilians (Digital Pioneers Initiative) — Egypt
DevOps Specialist Trainee — 01/2025

A training initiative focused on digital transformation and cloud computing

- Administered and troubleshot 10+ Linux lab environments (users, permissions, services, logs) following structured operational procedures
- Built 5+ Bash automation scripts to streamline repetitive CLI tasks (input validation, logging), reducing manual steps by ~30%
- Containerized 2+ small applications using Docker (Dockerfile, images, containers) to improve environment consistency across runs
- Created CI/CD pipeline labs (in-progress) using Jenkins/GitHub concepts to automate build/test steps and standardize delivery

Education

Egyptian E-Learning University (EELU) — Egypt
B.Sc. Computer Science & Information Technology — 09/2020 - 06/2024

Key Achievements

Graduation Project: AI-Enhanced HR Management System
Achieved an excellent grade on a graduation project focusing on AI-enhanced HR management systems

Bash Automation Scripts
Successfully reduced manual task execution time by approximately 30% through automation in a training setting

Languages

Arabic Native ●●●●●

English Proficient ●●●●○

Skills

Linux · Git · GitHub · Docker · Bash · AWS Fundamentals · Jenkins · Ansible · TCP/IP · Routing and Switching · CCNA Networking

Projects

Task Manager CLI (Bash) — GitHub
01/2023

Effective Task Management

- Built a Bash-based task manager supporting create/update/delete/list flows with robust input validation and error handling
- Implemented modular functions and file-based persistence to keep tasks consistent across sessions

Docker Containerization Project — 01/2023

Project focused on creating Docker containers to facilitate consistent application deployment

- Building environments in containers and Docker files for repeatable local deployments

CI/CD Lab — 01/2023

In-progress project aimed at establishing reliable CI/CD pipelines

- Designing CI/CD workflows to automate building and testing and improve deployment reliability

Training / Courses

DevOps Fundamentals: Linux Administration & Bash Scripting (RHCSA Level 1), Git & GitHub, Docker for Absolute Beginners
